LED Flat Panel Retrofit Kit
Wattage Color Select Controls Ready Series

1x4

2x2

2x4

Description:

The Flat Panel Retrofit Kit is an Enhanced product offering from Maxlite offering easy and cost-effective solution to upgrade fluorescent troffers to LED. The kit utilizes the existing troffer housing, thereby reducing labor time and expense since installation can be performed from below the ceiling. An existing troffer can be retrofitted in just minutes! The kit's LED light source delivers uniform illumination with minimal glare, and creates a clean aesthetic that is perfect for offices, retail, health care, educational, hospitality and other commercial facilities. With a Wattage and CCT select option, each unit provides more than 9 variations of the product giving flexibility to the end users and distributors. The kit also boasts one of the industry's highest efficacy (140 LPW), and is DLC premium qualified offering the best ROI for ESCO projects with maximum energy savings. As a true Controls Ready (CR) product, this series takes advantage of Maxlite's Patented c-Max plug and play system offering end users controls option even if the current system is not wired for controls.

Features:

- Quick Installation of Flat Panel Retrofit Kit in existing luminaire without the need to break the ceiling plenum.
- Design prevents any gaps from the retrofit fit in the existing troffer
- Includes safety cable to attach to housing

Construction:

- Standard Dimension for 1x4, 2x2 & 2x4 Retrofits
- Fits most existing Troffers

Form & Fit:

MaxLite recommends that a product sample is tested before projects begin to check fit of the retrofit kit. The retrofit kit is designed to fit into most preexisting troffers (lensed and parabolic).

Controls Ready:

MaxLite's new Controls Ready (CR) fixtures allows for quick and easy in-field installation (plug and play) of controls. Simply purchase any CR fixture and the required Controls Node and you're all set! See the accessory table for all controls options available for this fixture.

Ordering Information

1. Battery back up models are available only in Single Pack configuration.
Check the Specification Table for lumen output for EM and E2 suffix.

10-year standard warranty with labor allowance (further details available at www.maxlite.com/warranties)
Warranty Limitations: Product must be rated for application per the Product Data Sheet (PDS); operated ≤16 hrs; in ambient temperatures -4°F to 77°F. If ambient temperatures fall outside the -4°F to 77°F range, product is warrantied for 5 years according to the operating temperature range specified on the PDS. Up to $25/unit; registration required. Additional coverage may be available for purchase; contact MaxLite. Excludes EM/MS versions; component warranty applies.

*Maxlite recommends CN-RTPSW (PIR) sensor for most applications with this fixture.

If CN-RTMST(microwave) is required for an application, Maxlite recommends a pilot test to confirm there is no interference that causes unexpected responses from the microwave sensor.

** For Field Install BBU option, purchase BBU model# EBUUP17015N200B along with the ribbon flat test switch model# EBU-RTST-E15 and the mounting bracket FPR-BBUBRACKET14 for 1x4, or FPR-BBUBRACKET2224 for 2x2/ 2x4. Lumens delivered at BBU mode varies based on wattage and CCT setting. Lumens Delivered at field install BBU mode (lm):2900 lm - for 90 minutes, when fully charged.
