

HOSPITALITY LIGHTING

Create the Backdrop to the Extraordinary

Hospitality is the art of creating memorable experiences. Whether it's a family vacation, business trip, date night or spa day, lighting sets the scene for life's unforgettable moments. The right illumination welcomes guests into a lobby, makes tasks inside their room easier, inspires intimate dinner conversation and helps them relax during a much-needed massage. MaxLite offers a full suite of LED solutions designed to set the desired mood and enhance the guest experience.

Reduce Operational Costs by Increasing Efficiency

MaxLite LED lamps and luminaires offer a long life and energy efficiency. They are 70-80% more efficient than conventional light sources and can be combined with daylight harvesting controls and motion sensors for further energy savings. By replacing outdated lighting systems with more efficient technology, property managers can maintain, and even enhance, lighting levels using fewer lamps and lower wattages. But the money-saving benefits go beyond electricity costs; LED fixtures and lamps also require much less frequent maintenance. These gains in efficiency can lead to significant savings for businesses that operate 24/7, such as resorts, hotels, restaurants and gyms.

Influence Brand Perception

In today's competitive hospitality market, consumers judge properties not only on the amenities and services they provide. A company's commitment to sustainable practices increasingly factors into their decision of where to stay, dine, shop and relax. Choosing greener lighting alternatives can distinguish a brand and inspire consumer loyalty in a market filled with choices.

HOSPITALITY LIGHTING

Case Study:

MaxLite Filament Lamps Create
Ambience & Energy Savings for Hotel

“The reaction to the MaxLite LED Filament lamps has been very positive. They resemble the incandescent style they were looking for, while providing significant energy savings.”

-- William J. Puhlman,
Ferry Electric Company

Situated in the heart of Pittsburgh, PA, the recently opened Embassy Suites by Hilton Pittsburgh Downtown houses Elevation restaurant, a modern American bistro with panoramic views of the city. Located on the 25th floor of the historic Henry W. Oliver Building, Elevation encompasses a casual yet elegant dining approach focused on comfort food. When it came time to choose lighting for the restaurant and bar, the hotel’s owners wanted to install energy-saving LEDs, but their interior design plans called for the vintage look of exposed incandescent bulbs.

MaxLite LED Filament Lamps were the perfect solution. The lamps replicate the nostalgic look and warmth of incandescent filament bulbs while providing 90 percent energy savings and a much longer lifetime of 15,000 hours. Recognized in the 2015 Lighting for Tomorrow competition, the lamps are designed with linear LED filaments that resemble their incandescent counterparts and deliver light in a super warm, 2200K color temperature.

A variety of decorative shapes, including globe, ST18, T14 and candelabra, were suspended in clusters from the ceiling to create a warm and inviting atmosphere that complemented the restaurant menu and the rich history of the building. Local contractor Ferry Electric Company performed the installation.

HOSPITALITY LIGHTING

Dramatic lighting and colorful accents set the scene for memorable meals.

Flexible lighting options let guests stay focused or relax.

Many of our LED products are damp-listed for use in spas and bathrooms.

MAXLITE: 25 YEARS OF EXPERIENCE AND INNOVATION

MaxLite has provided certified energy-efficient lighting solutions to the commercial building, residential and OEM markets since 1993. We are a five-time recipient of the prestigious ENERGY STAR® Partner of the Year Award for our industry leadership, and continue to be at the forefront of energy efficient technologies through the innovative research and development capabilities of our teams and facilities in New Jersey and California.

Our customers include global leaders in manufacturing, education, health care, hospitality and retail. Our products illuminate businesses of all sizes, including national landmarks.

PERSONALIZED SERVICE

We work with our customers to ensure our products meet their installation goals, and remain by their sides long after. MaxLite provides a full range of complimentary services, including:

- Facility audits
- ROI calculations
- Local representation
- Lighting layouts
- Utility rebate assistance
- Lifetime product service

FAST DELIVERY

MaxLite keeps its products in stock and available for immediate purchase and delivery, shipping within the United States in one to three business days on standard orders.

UTILITY REBATES

Utility rebates can significantly reduce the overall cost of ownership of LED lighting. Most MaxLite fixtures and lamps are ENERGY STAR® certified or DesignLights Consortium (DLC) qualified, making them eligible for nationwide rebate programs. Our Utility Rebate Team will work with you to transform the lighting in your facility, while ensuring your upfront investment is paid back as quickly as possible.

LABOR INCLUDED
Applies to most LED fixtures.
