

# RESIDENTIAL LIGHTING

## Lighting That Brings A Home to Life

Lighting has a tremendous influence on the look and feel of a room. The right illumination can enhance the drama of an entranceway, make a living room cozier or transform an ordinary backyard into an oasis. Whether it's to make daily chores a little brighter or evenings more relaxing, MaxLite offers a complete line of energy-efficient LED lamps and fixtures to set the right mood in every area of the home, inside and out.

MaxLite's line of residential products includes recessed cans, retrofits, ceiling fixtures, replacement lamps and outdoor fixtures, all designed to increase the quality of light and lower energy bills for homeowners. Our lamps and luminaires offer many convenient, energy-saving features, such as dimming on indoor models and automatic daylight shut-off and motion sensors on outdoor models. MaxLite LED products offer many benefits over incandescent and CFL bulbs. Not only are they more durable, they contain no mercury or other hazardous materials, do not emit ultra-violet or infrared rays during operation, last up to 100,000 hours and do not burn out (they become dimmer after their lifetime).

## RESIDENTIAL LIGHTING

### Case Study:

MaxLite LED Lightbars Featured on  
DIY Network's "Bath Crashers"

More than 50 million American households have viewed MaxLite's LED Lightbars on "Bath Crashers" on DIY Network. In Episode 404, "Basement Bathroom Overhaul", the lightbars were installed discreetly in three handmade light boxes that were installed on the bathroom wall. Four lightbars were installed around the perimeter of each light box, creating unobtrusive light sources to add a nice glow to the panes of glass in the center of the boxes. In addition to the lightboxes, the LED Lightbars were installed under the countertop of the bathroom vanity, which made the glass surface glow above. The host proudly boasted the long-lasting 50,000-hour life of the energy-efficient fixtures.

The original bathroom was dark and dreary and shown with outdated furnishings. After the bathroom's demolition and reconstruction, the homeowners were brought to tears of joy after witnessing the bathroom's stunning makeover. The new sink, shower, hardware and lighting yielded a clean, cool and modern look.

## The ENERGY STAR® Advantage

MaxLite offers ENERGY STAR certified luminaires and replacement lamps in a variety of shapes and sizes for any application — including recessed cans, track lighting, table lamps, and more. To earn the ENERGY STAR label, our lamps and luminaires have been independently certified and undergone extensive testing to assure that they will save energy and perform as promised. Upgrading to ENERGY STAR qualified LED light sources can significantly reduce operating, maintenance and cooling costs for homeowners. ENERGY STAR qualified LED lamps:

- Use 70-90% less energy than incandescent bulbs
- Save homeowners \$30 to \$80 in energy bills
- Provide the same brightness (lumens) with less energy (watts)
- Last 10 to 25 times longer than incandescent bulbs
- Help protect the environment and prevent climate change

Take kitchen lighting from functional to fabulous.

Enhance the beauty and security of a home's exterior.

Make a favorite piece of art the focal point in a room.

### MAXLITE: 25 YEARS OF EXPERIENCE AND INNOVATION

MaxLite has provided certified energy-efficient lighting solutions to the commercial building, residential and OEM markets since 1993. We are a five-time recipient of the prestigious ENERGY STAR® Partner of the Year Award for our industry leadership, and continue to be at the forefront of energy efficient technologies through the innovative research and development capabilities of our teams and facilities in New Jersey and California.

Our customers include global leaders in manufacturing, education, health care, hospitality and retail. Our products illuminate businesses of all sizes, including national landmarks.

### PERSONALIZED SERVICE

We work with our customers to ensure our products meet their installation goals, and remain by their sides long after. MaxLite provides a full range of complimentary services, including:

- Facility audits
- ROI calculations
- Local representation
- Lighting layouts
- Utility rebate assistance
- Lifetime product service

### FAST DELIVERY

MaxLite keeps its products in stock and available for immediate purchase and delivery, shipping within the United States in one to three business days on standard orders.

### UTILITY REBATES

Utility rebates can significantly reduce the overall cost of ownership of LED lighting. Most MaxLite fixtures and lamps are ENERGY STAR® certified or DesignLights Consortium (DLC) qualified, making them eligible for nationwide rebate programs. Our Utility Rebate Team will work with you to transform the lighting in your facility, while ensuring your upfront investment is paid back as quickly as possible.
