BASE**

7W
650 lm

11W
1,000 lm

The LED Disc Light's versatility as a flush mount fixture and surface downlight saves electrical contractors time, labor and space by making it possible to install custom downlighting without a recessed can. Adding to it, the new generation is wet location rated, CCT selectable (2700K/3000K/4000K/5000K), Title 24 compliant, and ETL listed as both a retrofit kit and a luminaire. The slim-profile Disc Light is available in two sizes, and mounts directly to a 3"/4"/5"/6" housing and standard 4" J-Box. In other words, more options and fewer SKUs to stock on distributor shelves and job sites!

The Disc Light provides exceptional performance in general lighting applications for homes, hotels, motels and commercial properties, and can also serve as a cost-effective temporary lighting solution. The luminaire is the ideal choice for adding energy-efficient and long-lasting downlighting to bathrooms, showers, spas and other indoor wet locations environment.
